

Invitation

to the

Applied Mathematics Challenge - 2019

The Math Club

Mathematics For Elementary and Middle School Students

Sponsored by

The Math Club and Quigley Scientific Corporation

The Applied Mathematics Challenge is a contest offering for the developing and the advanced math student. Once a student has experienced the math contest problems that were designed for the quick answers or at most five or six minute solution times, the **Applied Mathematics Challenge** offers the student the next level of deeper thought, methodologies and a research oriented experience in a mathematics contest.

In the Lexington community, Joe Quigley has sponsored math teams over the past twenty-three years. He is an industry consultant in mechanical and aerospace engineering, design and mathematical analysis. His efforts have resulted in a customized set of materials that prepares the math student for the rigors of the contests at the elementary school and middle school levels. The Math Club operates from September through June in weekly practice sessions with supervision, instruction and coaching by Joe Quigley.
